

THE LAUNCHING PAD

Houston – Johnson Space Center –
How many of you have worked directly
or indirectly for JSC?

I. CHURCH FACILITIES ARE A TOOL...

The church building should be a base
for launching...To GO into all the world.

II. LAUNCH PAD...

A launch pad is the area and facilities
where rockets or spacecraft lift off.

A [spaceport](#) (or rocket launch site) can
contain one or many launch pads.

III. PURPOSE OF A LAUNCH PAD...

A typical launch pad consists of the
service and umbilical structures. The
service structure provides an access
platform to inspect the launch vehicle
prior to launch.

What are we to be launching? We are here to launch people and ministries.

Most service structures can be moved or rotated to a safe distance. We are to embrace people rather than hold them at a distance. Some will no doubt blow up on us but that should not keep us from continuing to embrace people and ministries.

IV. FUEL AND COMMUNICATION...

The umbilical structure has propellant loading, gas, power, and communication links to the launch vehicle.

We have been called to train and fuel people and ministries. this can be grueling, time consuming, and expensive but when launch takes place it will be worth it.

If NASA had never sent a vehicle into space we would not have:

- GPS...
- Computers...
- The internet...
- Smart phones...
- Satellite television...
- Knowledge that makes our life better...

V. PROTECTION...

The launch vehicle sits atop the launch platform, which contains a flame deflection structure to withstand the intense heat and forces generated by rocket engines during liftoff.

Launching people and ministries is expensive and dangerous but I believe God is committed to shielding and protecting people who dare to work toward liftoff.

CONCLUSION:

I need your help with three things:

- Make the best commitment you can possibly make between now and the end of the year...
- Agree to become a table host for a series of meal functions over the next couple of weeks...
- Use your influence to bring your friends to the table to assist us in this effort...
